

Robert Bledsoe changed the face of traditional landscaping in 1989,

- C R E A T O R O F L I V I N G A R T -

Pioneering what today, is called the - "Outdoor Living Area"

From designing and building lakes, golf courses, sky high fountains, and water features. Bringing together all of nature's elements earth, fire, water, his vision is as infinite as nature itself.

For Bledsoe, it has always been about creating a lifestyle, not just a swimming pool or landscape project, albeit, commercial or residential.

It is the norm, rather than the exception, for Roberts projects to include custom outdoor living areas such as;

Luxurious custom design swimming pools.

Hot tubs & Jacuzzis

Breathtaking water features, fountains, lakes, streams, golf courses.

Elaborate outdoor kitchens designed with all of the amenities.

Outdoor Fireplaces, Fire Pits, Fire Columns.

Pool Houses complete with Master suite sized Bath and Changing Rooms.

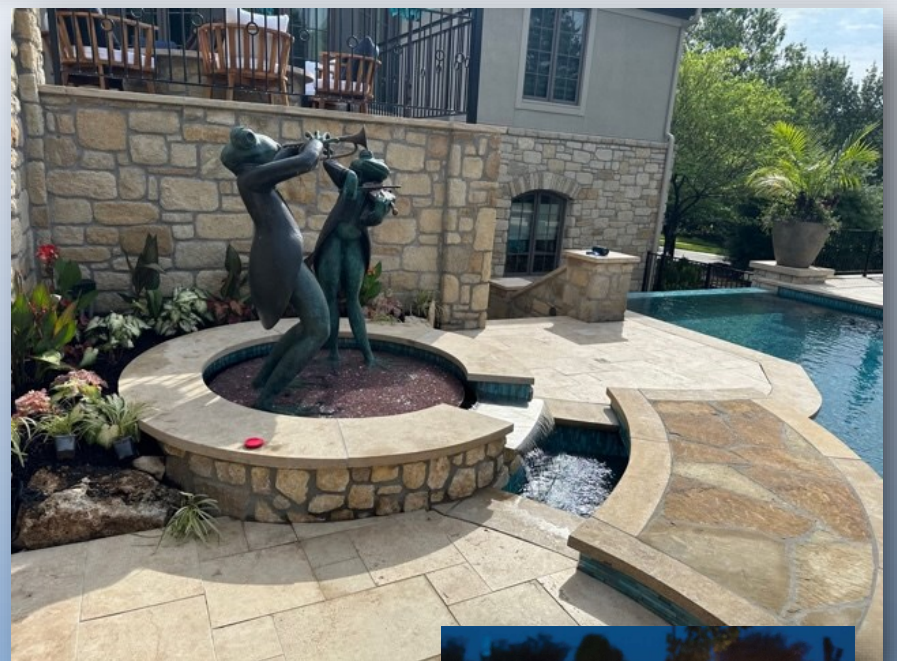

Bledsoe continues to remain the most sought-after design-build artist of outdoor living areas in the Midwest, and beyond.

No outdoor living area is ever the same and is created from the homeowner's wish list," then collaborated with Robert's vision.

Creating pieces of "Living Art." with the untouched landscape as his artist palette, stone, water, fire, the selective placement of these natural elements tied together into an outdoor living area that looks as nature intended. An oasis right outside the back door.

These are not just projects mind you,

these are works of *"Living Art"*

*"Check it Out!"*
